Exhibit E-1

On August 12, 1989, we delivered the transmitter to the antenna site. Four days latter we delivered the coaxial transmission line. On September 06, 1989, the special three phase 220 volt, power was installed. On September 10, 1989 the RCA exciter and McMartin modulation monitor was calibrated and delivered. On September 18, 1989, the McMartin consoles were delivered to Lake Charles. We are currently in the process of constructing the studios.

Exhibit E-2

The construction has not been completed because we discovered that the antenna had been placed on the wrong frequency when it was built. It is now being retuned to the proper frequency, (91.7 mHz.)
